## SHOWROOMS

With more than 400 showrooms spread worldwide; from Madrid to New York, through cities like London, Milan or Paris, Porcelanosa Grupo thus assures its presence in the five continents to show the steady improvement in innovation and design of all its products.

PORCELANOSA

## AUSSTELLUNGEN

Inzwischen sind es bereits über 400 Ausstellungen, die in der ganzen Welt verteilt sind, von Madrid, London, Mailand oder Paris bis nach New York. Auf diese Weise sichert Porcelanosa Gruppe ihren ständigen Fortschritt in allen Kontinenten bei Innovation und Design ihrer Produkte aufzuzeigen.

## SALLES D'EXPOSITION

Nous comptions plus de 400 salles d'expositions réparties dans le monde; de Madrid à New York en passant par Londres, Milan et Paris. Porcelanosa Gruppe assure ainsi sa présence sur les cinq continents et ceci afin de montrer l'amélioration dans l'innovation et la conception de nos produits.

## LOJAS

Com mais de 400 lojas repartidas por todo o mundo; de Madrid a Nova-Orlândia, passando por cidades como Londres, Milão ou Paris, Porcelanosa Gruppe assegura assim a sua presença nos cinco continentes para mostrar o contínuo progresso de inovação e design de todos os seus produtos.

# INFRAESTRUCTURA

## INFRAESTRUCTURA

En PORCELANOSA basamos el éxito de los productos en tres premisas: una buena calidad absoluta, una red comercial propia y una infraestructura que engloba todos estos factores. Para nosotros, la infraestructura es un punto clave en el éxito de nuestros productos. Nuestra intención es que en nuestras instalaciones se produzca una perfecta combinación entre funcionalidad, versatilidad y distinción.

## GLI IMPIANTI

In Porcelanosa basiamo il successo dei nostri prodotti in tre concetti: Qualità assoluta, rete commerciale propria e una infrastruttura che incorpora tutti questi concetti. Per noi, le infrastrutture sono il punto più importante per il successo dei nostri prodotti. Il nostro obiettivo è che nei nostri stabilimenti si produca una perfetta combinazione tra funzionalità, versatilità e distinzione.

## THE INFRASTRUCTURE

At Porcelanosa we base the success of our products on three premises: unconditional quality, a commercial network of our own and an infrastructure to embrace all these factors. We think the infrastructure is key to the success of our products. We want our installations to have a perfect combination of functionality, versatility and distinction.

## DIE INFRASTRUKTUR

Die Grundlage für den Erfolg unserer Produkte beruht auf folgenden Prämisen:  
 -Eine einwandfreie Qualität.  
 -Ein eigenes Vertriebsnetz.  
 -Eine Infrastruktur, die alle diese Faktoren mit einbezieht.

Die Infrastruktur ist die Grundvoraussetzung für den Erfolg unserer Produkte. Wir beabsichtigen in unseren Anlagen eine perfekte Kombination von Funktionalität, Vielfältigkeit und Lebensqualität zu schaffen.

## L'INFRASTRUCTURE

Chez Porcelanosa, nous appuyons le succès de nos produits sur trois paramètres: une qualité absolue, son propre réseau commercial et une infrastructure qui regroupe tous ces facteurs. Pour nous, l'infrastructure est un élément clé dans le succès de nos produits.

Dans nos installations nous voulons créer un parfait mariage entre fonctionnalité, variabilité et distinction.

## A INFRASTRUCTURA

Na Porcelanosa destacámos o êxito dos nossos produtos em três parâmetros: Qualidade absoluta, uma rede comercial própria e uma infraestrutura que engloba todos estes factores. Para nós, a infraestrutura é ponto chave no êxito dos nossos produtos. A nossa intenção é que estas produzam uma perfeita combinação entre funcionalidade, versatilidade e distinção.

# COMPROMISO CON EL MEDIO AMBIENTE

## COMPROMISO CON EL MEDIO AMBIENTE

El compromiso adquirido por PORCELANOSA desde el inicio de su actividad industrial en el cuidado y respeto a su entorno natural y el medio ambiente en su conjunto, se pone de manifiesto a través de ECOTECH®, un compendio de ideas y actuaciones de carácter medioambiental, entre las que podemos destacar las fuertes inversiones realizadas cada año en sistemas de reprovechamiento de aguas, valorización de residuos, protección de la atmósfera y ahorro energético, o la certificación de su sistema de gestión ambiental según las directrices de la norma ISO 14001.

## COMPROMESSO CON L'AMBIENTE CIRCONDARIO

L'impegno acquisito da Porcelanosa fin dall'inizio della propria attività industriale nei confronti della natura e dell'ambiente nel suo complesso è evidente con ECOTECH®, un insieme di idee e di azioni che interessano l'ambiente, tra le quali si possono sottolineare i grandi investimenti effettuati ogni anno per i sistemi di riutilizzo dell'acqua, la valorizzazione dei rifiuti, la protezione dell'atmosfera e il risparmio energetico, o la certificazione del proprio sistema di gestione ambientale secondo le direttive della norma ISO 14001.

## KOMPROMISS MIT DER UMWELT

Seit Beginn ihrer gewerblichen Tätigkeit hat sich die Gruppe Porcelanosa dem Schutz und Respekt ihrer natürlichen Umgebung und der Umwelt insgesamt verschrieben. Dies wird durch ECOTECH® zum Ausdruck gebracht, die eine Zusammenfassung von Ideen und Aktionen zum Umweltschutz, zu denen vor allem kräftige Investitionen gehören, und jedes Jahr für Systeme zur Wiederaufbereitung von Wasser, Bewertung von Abfällen, Schutz gegen Luftverschmutzung und Energieeinsparungen getätigt werden. Auch die Zertifizierung ihres Umweltmanagementsystems nach den Richtlinien der ISO-Norm 14001 stellt diese Einstellung unter Beweis.

## COMPROMISSO COM O MEDIO AMBIENTE

O compromisso mantido pela Porcelanosa desde o inicio da sua actividade industrial no cuidado e respeito pelo ambiente natural e pelo meio ambiente no seu conjunto, manifestase a través da ECOTECH®, um compêndio de ideias e ações de carácter ambiental, entre as quais podemos destacar os grandes investimentos realizados todos os anos em sistemas de reaproveitamento de água, de valorização de resíduos, de protecção da atmosfera e de poupança de energia, assim como de certificação do seu sistema de gestão ambiental, isto de acordo com as directrizes da norma ISO 14001.

| ATENCIÓN: PRODUCTO ESPECIAL   |  |  |  |  |  |  |  |  |
|---|--|--|--|--|--|--|--|--|
| WARNING: SPECIAL PRODUCT  |  |  |  |  |  |  |  |  |
| La manipulación indebida durante la colocación y rejuntado, puede causar rayados y rozaduras de los que <b>PORCELANOSA S.A.</b> no se hace responsable.   |  |  |  |  |  |  |  |  |
| No utilizar para la retirada de material de rejuntado y la limpieza del producto agentes abrasivos.   |  |  |  |  |  |  |  |  |
| Evitar contactos prolongados de la superficie decorada con ácidos y álcalis.  |  |  |  |  |  |  |  |  |
| Se recomienda usar como agentes de limpieza únicamente agua y jabón neutro.   |  |  |  |  |  |  |  |  |
| Al tratarse de un material delicado, su manipulación ha de ser cuidadosa. Adoptar métodos de colocación específicos del tipo de material (utilizar adhesivos y material de rejuntado apropiados). |  |  |  |  |  |  |  |  |
| Evitar, durante la instalación, el uso de utensilios que puedan dañar el material cerámico.   |  |  |  |  |  |  |  |  |
| Utilizar técnica de doble enculado (aplicando material de agarre en la pieza y el soporte a embaldosar) para evitar las indeseables zonas vacías.   |  |  |  |  |  |  |  |  |
| No prolongar en exceso el secado del material de rejuntado en la superficie.  |  |  |  |  |  |  |  |  |
| Para el corte de las piezas, utilizar cortadoras e ingletadoras eléctricas con disco refrigerado con agua.  |  |  |  |  |  |  |  |  |
| This is a delicate material that must be handled with care. Use specific installation methods (use the proper bonding material).  |  |  |  |  |  |  |  |  |
| Do not use abrasive agents to clean this product.   |  |  |  |  |  |  |  |  |
| Avoid long contact of the decorated surface with acids and alkalins.  |  |  |  |  |  |  |  |  |
| Use only hot water and mild soap as cleaning agents.  |  |  |  |  |  |  |  |  |
| Improper manipulation during fixing and grouting can cause scratches for which <b>PORCELANOSA S.A.</b> will not take responsibility.  |  |  |  |  |  |  |  |  |
| Do not use abrasive agents to clean this product.   |  |  |  |  |  |  |  |  |
| Avoid long contact of the decorated surface with acids and alkalins.  |  |  |  |  |  |  |  |  |
| Use only hot water and mild soap as cleaning agents.  |  |  |  |  |  |  |  |  |
| This is a delicate material that must be handled with care. Use specific installation methods (use the proper bonding material).  |  |  |  |  |  |  |  |  |
| Do not use tools that could damage material during installation.  |  |  |  |  |  |  |  |  |
| Use the floating ad buttering method, applying the bonding material to both the back of the piece and the substrate, so as to ensure that there are no unwanted voids.                            |  |  |  |  |  |  |  |  |
| Grouting material should not be let to dry for a too long time in the surface.  |  |  |  |  |  |  |  |  |
| To cut pieces, use electric water-cooled cutters and mitring saws.  |  |  |  |  |  |  |  |  |

#### ATENCIÓN: PRODUCTO ESPECIAL

La manipulación indebida durante la colocación y rejuntado, puede causar rayados y rozaduras de los que PORCELANOSA S.A. no se hace responsable.

No utilizar para la retirada de material de rejuntado y la limpieza del producto agentes abrasivos.

Evitar contactos prolongados de la superficie decorada con ácidos y álcalis.

Se recomienda usar como agentes de limpieza únicamente agua y jabón neutro.

Al tratarse de un material delicado, su manipulación ha de ser cuidadosa. Adoptar métodos de colocación específicos del tipo de material (utilizar adhesivos y material de rejuntado apropiados).

Evitar, durante la instalación, el uso de utensilios que puedan dañar el material cerámico.

Utilizar técnica de doble enculado (aplicando material de agarre en la pieza y el soporte a embaldosar) para evitar las indeseables zonas vacías.

No prolongar en exceso el secado del material de rejuntado en la superficie.

Para el corte de las piezas, utilizar cortadoras e ingletadoras eléctricas con disco refrigerado con agua.

#### WARNING: SPECIAL PRODUCT

Improper manipulation during fixing and grouting can cause scratches for which PORCELANOSA S.A. will not take responsibility.

Do not use abrasive agents to clean this product.

Avoid long contact of the decorated surface with acids and alkalins.

Use only hot water and mild soap as cleaning agents.

This is a delicate material that must be handled with care. Use specific installation methods (use the proper bonding material).

Do not use tools that could damage material during installation.

Use the floating ad buttering method, applying the bonding material to both the back of the piece and the substrate, so as to ensure that there are no unwanted voids.

Grouting material should not be let to dry for a too long time in the surface.

To cut pieces, use electric water-cooled cutters and mitring saws.

## INSTRUCCIONES DE COLOCACIÓN // BALDOSAS CERÁMICAS

**1-** Resulta de gran importancia en la colocación la elección de las herramientas y útiles adecuados (tanto la llana dentada, como la maza de goma, ventosas y crucetas para la colocación y la llana de goma para el rejuntado).

**2-** El soporte (pared o suelo) que se va a revestir debe estar perfectamente nivelado, no presentando defectos de planitud.

Recomendamos la impermeabilización previa de los ambientes de adhesivo origina diversas tensiones con la superficie cerámica que terminan provocando "cejas".

**3-** La superficie a revestir debe estar totalmente limpia de polvo o cualquier otra sustancia que pueda perjudicar la adhesión de las baldosas. Así se facilita una mejor adherencia del material de agarre sobre el soporte utilizado.

**4-** Durante la colocación la intensidad de la luz debe de ser tal que nos permita distinguir con facilidad la presencia de cualquier defecto, en especial la aparición de "cejas". Durante esta fase, se debe trabajar con una intensidad de luz superior a la que iluminará el ambiente una vez finalizada la obra. La utilización de focos nos ayudará a evitar este problema.

**5-** La elección del tipo de adhesivo a emplear resulta fundamental. Se debe tener en cuenta las propiedades del soporte que vamos a revestir (superficie de ladrillo, madera, yeso, metal...), las características del metal cerámico elegido (revestimiento poroso, gres o porcelánico) el formato de la baldosa y el destino de uso.

En los catálogos de PORCELANOSA se recomienda el material de agarre adecuado.

**6-** Se recomienda el sistema de colocación en capa fina, con un adhesivo flexible. Para formatos superiores a 31,6x31,6 (1.000 cm<sup>2</sup>) se recomienda la técnica de doble encolado, que consiste en la aplicación del adhesivo tanto sobre la superficie de colocación como sobre el dorso de la baldosa cerámica.

**7-** Todas las baldosas cerámicas y en especial los materiales rectificados, requieren una manipulación cuidadosa, para evitar despuntados, desenchufados o la aparición de rayas en la superficie.

La GUÍA DE LA BALDOSA CERÁMICA recomienda no hacer la colocación con separación inferior a 1,5 mm. entre pieza y pieza

**8-** En la colocación de baldosas cerámicas se recomienda utilizar crucetas de al menos 1 mm. En modelos rústico la junta mínima aconsejada es de 3 mm. Para formatos rectangulares, cuando se colocan a junta trabada, se aconseja igualmente colocar a 3/4 de pieza.

**9-** En los paros de colocación, se debe tener en cuenta que el material ya colocado ha retraído y que el que vamos a colocar va a sufrir el mismo movimiento. Se debe de predecir, por lo tanto, el posible movimiento o retracción, ya que si seguimos colocando al mismo nivel, la posterior retracción puede originar un pequeño desnivel.

**10-** Hay que considerar en cualquier caso la presencia de juntas perimetrales que ayudarán a absorber cualquier movimiento post-obra. Estas juntas han de permanecer vacías o llenas de cualquier material comprimible y deben tener una anchura mínima de 8 mm. Esta junta se disimula con el zócalo o con el propio azulejo.

**11-** Antes del rejuntado se comprueba que las juntas de colocación (entre baldosa y baldosa) están vacías y limpias de materiales de agarre y restos de suciedad.

Cualquier agente intermedio puede restar efectividad a la junta de colocación, dificultando además la adherencia del material de juntas.

**12-** El relleno de juntas se realiza cuando las baldosas se encuentren perfectamente adheridas al soporte. En el caso especial del pavimento, se deben seguir las recomendaciones del fabricante de adhesivos, con el fin de dejar transcurrir el tiempo suficiente antes de ser pisado o sometido a cualquier tipo de carga.

**13-** El material de rejuntado se aplicará con llana de goma, evitando en todo momento la utilización de llanas metálicas, que puedan dañar la superficie esmaltada. Existe en el mercado material de juntas en una amplia gama de colores, para poder asegurar la uniformidad de tono de cualquier ambiente formado.

**14-** Se deben evitar agentes de limpieza que contengan ácido fluorídrico (HF) y detergentes sólidos que contengan partículas susceptibles de abrasionar el material. El ácido fluorídrico eliminaría totalmente la superficie esmaltada del material, causando así daños irreparables.

**15-** Se hace imprescindible, en la colocación del pavimento, la protección del material ya colocado con sistemas adecuados, para impedir posibles daños hasta la finalización de la obra, debido a la presencia de material abrasivo y continuo trasiego de herramientas. De esta forma, además de la protección del material, se facilitan así las posteriores tareas de limpieza.

**16-** Se deben evitar agentes de limpieza que contengan ácido fluorídrico (HF) y detergentes sólidos que contengan partículas susceptibles de abrasionar el material. El ácido fluorídrico eliminaría totalmente la superficie esmaltada del material, causando así daños irreparables.

## INSTALLATION INSTRUCTIONS // CERAMIC TILES

**1-** Installation of ceramic tiles should be carried out by skilled personnel, with demonstrable experience and appropriate tools and equipment, (i.e. toothed trowels, tile spacers, rubber mallets and suction cups for installation, and rubber trowels, sponges and containers for grouting). Check the information contained on the packaging beforehand, and meticulously follow the manufacturer's recommendations.

**2-** Check that the substrate to be covered is stable and the base is suitable for installing ceramic tiles: rough texture, not friable, completely flat and level. We recommend that all damp areas are waterproofed.

**3-** Surfaces to be tiled must be completely free of dust or any other substance which could impair tile adhesion. For specific installations (radiant heating systems, facades with mechanical anchors, ceramics on roofs/ceilings or particular design constraints) request additional information specifically for each application.

**4-** The workplace must be adequately lit to detect possible installation defects easily, especially lippage between tiles. Electric site lighting is recommended, to provide brighter than normal light.

**5-** Choose the type of adhesive depending on the conditions and tiles used. The choice of tile and adhesive are critical to the subsequent performance of the entire work. Factors to take into account are: the type of ceramic material, tile format, substrate and end use (any traffic it will be subjected to, safety requirements in respect of falls ...). PORCELANOSA catalogues contain recommendations in respect of use and slip resistance, as well as the butech adhesive recommended for each design.

**6-** The only fixing system recommended is installation on a thin layer using a toothed trowel. A double bonding technique (with adhesive applied to both the substrate and the back of the ceramic tile) is recommended for tiles with a format larger than 1.000 cm<sup>2</sup>.

**7-** Great care should be taken when handling to avoid scratching, breaking or chipping the tiles, especially rectified tiles. Prior to installation, check that the tiles are free from defects.

**8-** Grout joints should be at least 1mm for interior flooring and 5mm for exterior paving. For installations with offset joints, stagger the tiles at the 1/4 point. Self-leveling tile spacers are recommended.

**9-** Follow manufacturer's recommendations in respect of the preparation and use of adhesives. Do not apply adhesive at a thickness greater than indicated on the label, check the wetting capacity of the adhesive and press the ceramic tile into the bonding material with a side to side movement. Distribute the adhesive evenly under the tile. Different thicknesses may produce lippage defects caused by differential shrinkage of the bonding material. When positioning adjacent to previously installed ceramic tiles, estimate possible shrinkage and compensate for this.

**10-** Edge joints occurring at corners, changes of paving level and changes of material should be covered with tile trim or a tile itself and sealed with flexible sealant. Minimum joint width: 8 mm.

**11-** Take account of structural joints. Movement joints should be positioned as directed by the project designer. In general, do not design areas greater than 50-70 m<sup>2</sup> for interiors and half that for exteriors. Minimum joint width: 8 mm.

**12-** Both during installation and at the end of the day, check the quality of the work carried out before the bonding material sets. Correct any defects using suction cups and rubber mallets.

**13-** Prior to grouting, check that the bonding material has hardened. Remove the tile spacers, clean the joints along their length, width and depth, and check the joint is not damp.

**14-** Joints should be grouted when the tiles are completely fixed to the substrate. In respect of paving, follow the recommendations of the adhesive manufacturer to ensure sufficient time is allowed before the floor is walked on or subjected to load. In this way movement and/or breakages are avoided.

**15-** Follow the manufacturer's recommendations in respect of the preparation and use of grouting materials. Ensure that the material and tools chosen do not damage the tile surface. The grout should be applied using a rubber trowel. PORCELANOSA catalogues contain details of the butech materials recommended for each design.

**16-** Wait for the grout to start to dry, then clean with a sponge dampened in clean water. Do not allow the grout to harden on the tile, especially on textured tiles. Do not soak the joint with excess water.

### I. COMPORTAMIENTO HIGIÉNICO DE LAS BALDOSAS CERÁMICAS

El proceso de fabricación de las baldosas cerámicas comprende entre sus etapas, una cocción a alta temperatura (del orden de 1100°C-1200°C), e incluso superiores en el caso de porcelánico. Esta temperatura produce reacciones químicas entre los diferentes componentes de la pasta y la decoración así como transformaciones físicas cuyas principales consecuencias son la formación de una estructura dura, compacta y resistente y la reacción e inmovilización de los metales pesados al formarse compuestos que se caracterizan por su alta inactividad química.

Por ello, la presencia de cualquier microorganismo queda descartada al someter al producto durante su fabricación a regímenes de temperatura que hacen imposible su supervivencia.

Los revestimientos y pavimentos cerámicos, si están correctamente instalados (con los materiales de agarre y rejuntado apropiados a su función de uso), representan la alternativa más eficaz, cómoda y segura para mantener las condiciones adecuadas de higiene y limpieza.

Su superficie impermeable, evita la intrusión de líquidos, vapores, sustancias tóxicas o cualquier otro contaminante; evita a su vez, la generación de reacciones, putrefacciones, esferulencias o cultivo orgánico por sus características no porosas.

Por otra parte, su resistencia química, les hace susceptibles de soportar, sin sufrir alteración, productos detergentes y desinfectantes agresivos, difícilmente utilizables sobre otros materiales de revestimiento y pavimento. Así mismo, por su equipotencialidad eléctrica y la no-predisposición al acumulo de cargas electrostáticas, los revestimientos cerámicos contribuyen al confort fisiológico y evitan la captación del polvo ambiental eléctricamente activo.

La naturaleza de la superficie cerámica evita cualquier fenómeno de adherencia y si ésta se produce por medio de un vehículo intermedio (grasa, barro, etc.) es fácilmente eliminable. Este mismo razonamiento sirve para exaltar las positivas propiedades higiénicas del producto cerámico respecto al depósito, acumulación y anidación de microorganismos y sustancias patógenas y alérgicas.

### 2. PRECAUCIONES DURANTE LA COLOCACIÓN:

a) La retirada de los restos de material de rejuntado se debe realizar utilizando una esponja humedecida en agua limpia. Esta operación no se debe prolongar en el tiempo, ya que un excesivo tiempo de contacto con la superficie esmaltada, dificulta la posterior eliminación del mismo, en especial aquellos modelos que su superficie presenta relieves.

b) Se hace imprescindible, en la colocación del pavimento, la protección del material ya colocado con sistemas adecuados, para impedir posibles daños hasta la finalización de la obra, debido a la presencia de material abrasivo y continuo trasiego de herramientas. De esta forma, además de la protección de la superficie cerámica, se facilitan así las posteriores tareas de limpieza.

c) Se deben evitar agentes de limpieza que contengan ácido fluorídrico (HF) y detergentes sólidos que contengan partículas susceptibles de abrasionar el material. El ácido fluorídrico eliminaría totalmente la superficie esmaltada del material, causando así daños irreparables.

### 3. CONSEJOS DE MANTENIMIENTO

Los pavimentos y revestimientos cerámicos porosos vidriados y los no porosos sin vidrio no necesitan ningún mantenimiento después de concluir todas las operaciones de puesta en obra. De entre todos los materiales y productos empleados como revestimientos y pavimentos, la cerámica es la que presenta menores exigencias en este campo.

Con independencia de las características del vidriado, características intrínsecas como la resistencia a la abrasión superficial o al rayado, vienen directamente relacionadas con el agente abrasivo que se coloca como fase intermedia entre el pavimento y la suela del calzado que transita sobre éste. Para evitar desgaste prematuro, es recomendable mantener los suelos debidamente limpios; a lo que ayuda sobremanera la colocación de alfombras

en la entrada a locales con acceso directo desde la calle o el jardín. Los pavimentos y revestimientos vidriados tienen suficiente para la limpieza ordinaria con una pasada con mocho o esponja humedecida para devolver el aspecto superficial original, aunque también es aconsejable utilizar productos de limpieza domésticos.

Si con el transcurso del tiempo, se observa una superficie de aspecto plástico con mayor dificultad para mantenerse limpia, de forma general, suele deberse a la formación de una capa superficial. Esta capa resulta difícil de eliminar con la fregona convencional. Para eliminarla y conseguir la superficie original, se debe emplear una disolución ligeramente ácida (añadir sulfato de amonio en una proporción del 5% en agua) y ejercer una rotación más intensa (cepillo de púas de plástico duro). Aclarar posteriormente con suficiente agua para eliminar la suciedad desincrustada.

El empleo de un mocho de microfibra y agua muy caliente favorecerá el secado de la superficie y minimizará la creación de una capa superficial sobre la baldosa, hecho que facilita el posterior marcado de las huellas y una mayor propensión a captar la suciedad.

No se deben emplear en la limpieza periódica sistemas rotativos o mecánicos con abrasivos de distinta naturaleza, ya que pueden modificar el brillo inicial en distinta medida, según intensidad del tratamiento e incluso en condiciones extremas, según presión y abrasivo utilizado, deteriorar la superficie cerámica.

Igualmente, al efectuar cualquier método de limpieza que se desvíe del convencional, conviene realizar un ensayo previo en una zona concreta antes de aplicar el tratamiento sobre toda la superficie. Así, nos aseguraremos de la inercia o reactividad de la superficie cerámica ante tal método.

Si es el caso del baño, donde se suelen formar incrustaciones de jabón o de carbonatos del agua, conviene efectuar limpiezas periódicas con un producto detergente adecuado, dejándolo en reposo durante unos minutos antes de proceder a su eliminación.

#### Eliminación de manchas e incrustaciones extraordinarias

Para limpiezas extraordinarias, por ejemplo las que son necesarias sobre superficies que han estado abandonadas de la limpieza durante mucho tiempo, se deben emplear detergentes en polvo o líquidos, aplicados frotando con una esponja o estropajo.

Especial atención merece las juntas entre baldosas, que deberán restaurarse en caso de falta de integridad o estanqueidad, con sellantes adecuados. No es aconsejable la utilización de cuchillas o espátulas metálicas sobre la superficie vidriada y tampoco es aconsejable el uso de productos concentrados cuando no se posea seguridad sobre la clase de resistencia química del revestimiento o pavimento.

Accidentalmente, nos podemos encontrar con que el pavimento o revestimiento cerámico se manche por acción de alguna o algunas sustancias de diversa naturaleza. Existen procedimientos físicos y químicos para la eliminación de manchas e incrustaciones, debiéndose adoptar el más idóneo al tipo de baldosa y naturaleza de la mancha.

Los métodos físicos se basan en la utilización de detergentes o abrasivos de gran finura, cuya función es el despegue físico de la mancha y el alejamiento de la superficie cerámica.

Los métodos químicos se basan en la reacción química entre la mancha o incrustación y el detergente que la disuelve o decolora.

En baldosas vidriadas no es aconsejable usar ácidos concentrados de naturaleza desconocida y que puedan atacar la superficie, por desconocerse su resistencia química.

En la tabla siguiente, y a modo de ejemplo, se exponen algunos productos adecuados para el tratamiento de determinadas manchas. Cuando no se conozca la naturaleza de la mancha conviene realizar pruebas con detergentes

### I. HYGIENIC PERFORMANCE OF CERAMIC TILES

The manufacturing process for ceramic tiles includes firing at high temperature (around 1100°C-1200°C), and even higher temperatures in the case of porcelain tiles. This temperature causes chemical reactions between the different components in the tile body and the glaze, as well as physical transformations whose main results are the creation of a hard, compact and highly resistant structure, and the reaction and immobilisation of heavy metals, by forming compounds characterised by their high level of chemical inactivity.

As a result, it is impossible for any microorganisms to be present, as the high temperatures used during the manufacturing process make it impossible for them to survive.

If ceramic wall and floor tiles are correctly laid using suitable bonding and grouting materials for their type of use, they are the most effective, comfortable and safe alternative for maintaining correct levels of hygiene and cleanliness. Their impermeable surface prevents the absorption of any type of liquids, vapours, toxic substances or any other type of contaminant, as well as the production of reactions, putrefaction, efflorescence or organic cultures, due to their non-porous features.

Also, their chemical resistance means they are capable of withstanding aggressive detergents and disinfectants without any alteration, which could not be used with other types of wall and floor coverings. The fact that they cannot become electrostatically charged means that they contribute towards physiological comfort and do not attract electrically charged dust in the atmosphere.

Ceramic tile surfaces are resistant to any type of adherence, and any substance that does become adhered due to the presence of materials such as grease or mud can be easily removed. This also applies to the hygienic properties of ceramic tiles in response to the deposition, accumulation and development of microorganisms and pathogenic or allergic substances.

### 2. PRECAUTIONS WHEN LAYING TILES:

a) Remnants of grouting material should be removed using a sponge dampened with clean water. The material should be removed as soon as possible, as if it is in contact with the glazed surface for a prolonged period of time it will be difficult to remove, especially on tiles with a relief patterned surface.

b) When laying floor tiles, it is essential to protect the tiles that have already been laid using a suitable method, to prevent damage caused by abrasive material and dragging tools across the surface. Apart from protecting the surface of the tiles, this will make any subsequent cleaning processes easier.

c) Do not use cleaning agents that contain hydrofluoric acid or solid detergents that contain particles that may scratch the material. Hydrofluoric acid will completely remove the glazed surface of the material, causing irreparable damage.

### 3. MAINTENANCE TIPS

Glazed porous as well as unglazed non-porous floor and wall tiles do not need any type of maintenance once they have been laid. From all of the different types of materials and products used as wall and floor coverings, ceramic tiles have the least maintenance requirements.

Regardless of the type of glaze, intrinsic features such as resistance to surface abrasion or scratching are directly associated with the abrasive agent between the tiles and the sole of the footwear moving over them. To avoid premature wear, floors must be kept clean, placing mats at the entrance to premises with direct access from the street or gardens.

Glazed wall and floor tiles only require normal cleaning with a mop or damp sponge to return them to their original appearance, although it is advisable to also use household cleaning products.

Cleaning agents containing waxes should not be used, as they will eventually form a film over the tile that will make them susceptible to absorbing and retaining foreign substances, causing stains that are highly visible and more difficult to eliminate using ordinary cleaning methods.

In bathrooms, where remnants of soap or lime scale can accumulate, tiles

should be cleaned regularly with a suitable detergent product, leaving it to act for a few minutes before rinsing.

Removing difficult stains and incrustations To remove difficult stains, for example on surfaces that have not been cleaned for some time, powdered or liquid detergents should be used. Rubbing with a sponge or scourer. Special attention should be paid to the tile joints, as they must be restored if they are no longer intact or waterproof, using appropriate sealants.

Metallic blades or spatulas should not be used on glazed tile surface, or concentrated products when you do not know the chemical resistance rating of the wall or floor tiles.

Accidents can cause ceramic wall or floor tiles to become stained with different types of substances. Stains and incrustations can be removed using physical and chemical methods, using the most suitable method for the type of tile and the type of stain.

The physical methods involve using detergents or very fine abrasives, which physically remove the stain from the tile surface. The chemical methods are based on a chemical reaction between the stain or incrustation and the detergent that dissolves it or discolors it.

Only use concentrated acids on glazed tiles if their composition is known, as certain types may affect the tile surface. The following table shows some examples of suitable products for treating specific stains. If the type of stain is unknown, different detergents should be tested, rinsing the surface with water and drying it after each test. In other cases, it may be effective to repeat the treatment several times or use hot water to help with the reaction.

| - TYPE OF STAIN                            | - DETERGENT   |
|--|---|
| Cement adhesive                            | Acidic detergent.   |
| Grouting remnants                          | Acidic detergent.   |
| Organic stains                             | Alkaline detergent.   |
| Felt pen                                   | Solvent (methylated spirits, acetone, ethanol).                       |
| Rubber remnants                            | Alkaline detergent, solvent.  |
| Pencil marks                               | Soft rubber.  |
| Grease and dirt                            | Bicarbonate and water.  |
| Dyes                                       | Dilute bleach solution.   |
| Iodine or bromine                          | Acidic detergent, hydrogen peroxide or dilute bleach solution.        |
| Blood                                      | Hydrogen peroxide or dilute bleach solution.                          |
| Silicone                                   | Vitro-ceramic hob scraper. Cloth soaked in acetone.                   |
| Coffee, tea, food, fruit, juice or make-up | Normal detergent dissolved in hot water + hydrogen peroxide or bleach |

In any event, if you have any doubts whatsoever, consult the technical data sheet for the product.

Also, when carrying out any unconventional cleaning method, first test a small zone before applying the treatment to the whole surface, checking the reaction.

## INSTRUCCIONES DE COLOCACIÓN // MOSAICO FIRENZE

RESULTA DE GRAN IMPORTANCIA EN LA COLOCACIÓN LA ELECCIÓN DE LAS HERRAMIENTAS Y ÚTILES ADECUADOS (LLANA DENTADA, MASA DE GOMA, CRUCETAS PARA LA COLOCACIÓN ASÍ COMO LLANA DE GOMA Y ESPONJA CON EL FIN DE FACILITAR UNA OPERACIÓN DE REJUNTADO ADECUADA).

EL ADHESIVO A UTILIZAR DEBE SER DEL TIPO CI SEGÚN NORMA EN12004 Ó SUPERIOR (EN CUALQUIER CASO, Y DEBIDO A LAS MÚLTIPLES POSIBILIDADES EN CUANTO A VARIEDAD DE SOPORTES Y SITUACIONES ESPECÍFICAS, CONSULTAR CON EL PROVEEDOR DE ADHESIVOS PARA CADA CASO). EL MATERIAL DE REJUNTADO SERÁ DEL TIPO CG2 SEGÚN NORMA EN13888. EN AMBIENTES HÚMEDOS, SE RECOMIENDA LA UTILIZACIÓN DE MATERIAL DE REJUNTADO CON COMPONENTES HIDRÓFUGOS Y ANTIMOHOS. BUTECH RECOMIENDA COLORSTUK RAPID O EPOTECH AQUA.

PARA CORREGIR POSIBLES DEFICIENCIAS EN LA PLANIMETRÍA DEL SUELO, SE RECOMIENDA COMENZAR LA INSTALACIÓN DEL REVESTIMIENTO A PARTIR DE UNA REGLA PERFECTAMENTE NIVELADA, A UNA ALTURA INFERIOR A 29 CM (LA PIEZA QUE ESTÁ EN CONTACTO CON EL SUELO SE CORTARÁ POSTERIORMENTE) DESDE EL NIVEL TEÓRICO DEL PAVIMENTO CERÁMICO. LAS PIEZAS SE DEJARÁN DESCANSAR DE FORMA NATURAL SOBRE LA REGLA, APOYANDO EN PUNTOS CONCRETOS PREFIJADOS EN EL DISEÑO DE LA PIEZA. DE ESTA FORMA, SE ASEGURO LA ALINEACIÓN DEL PANEL Y SE EVITAN LAS POSIBLES DEFICIENCIAS (DESCUADRES Y PROBLEMAS CON EL ENSAMBLE) QUE SE PODRÍAN GENERAR SI SE EMPIEZA CON PIEZA CORTADA DESDE EL SUELO Y EXISTE ALGUNA DESVIACIÓN AL CORTAR EL MATERIAL.

UNA VEZ CONCLUIDA LA COLOCACIÓN DEL REVESTIMIENTO POROSO (A EXCEPCIÓN DE LA PRIMERA FILA DE PIEZAS, LA QUE ESTÁ EN CONTACTO CON EL SUELO), SE INSTALA EL PAVIMENTO, Y POR ÚLTIMO, TRAS RETIRAR LA REGLA, SE FINALIZA CON LA ADHESIÓN DE ESA ÚLTIMA FILA DE PIEZAS, QUE NECESITAREMOS CORTAR A LA LONGITUD DEFINIDA POR LA DISTANCIA HASTA EL SUELO.

PARA EL CORTE DE LAS PIEZAS SE DEBE UTILIZAR UNA CORTADORA ELÉCTRICA DE DISCO, YA QUE EL SISTEMA DE CORTE MANUAL CON RODEL GENERA UN CANTO MÁS IRREGULAR. EN LOS ENCUENTROS ENTRE DOS PAREDES O EN LA UNIÓN PAVIMENTO/REVESTIMIENTO LA PIEZA TAMBIÉN DEBE SER MECANIZADA.

LA JUNTA PERIMETRAL SE DEBE RESPETAR, POR LO QUE LA PIEZA CORTADA NO PUEDE TOCAR LA PARED CONTIGUA, QUEDANDO UN ESPACIO MÍNIMO QUE AMORTIGUARÁ LOS POSIBLES MOVIMIENTOS. EN LOS ACABADOS DEL PANEL CONFORMADO, TANTO POR LA PARTE SUPERIOR (TECHO), COMO POR LOS LATERALES, SE HACE NECESARIO IGUALMENTE EL CORTE DE PIEZAS.

RESULTA MUY ÚTIL LA UTILIZACIÓN DE PERFILES COMO CULMINACIÓN EN VERTICES O CANTOS VIVOS, MEJORANDO EL ACABADO FINAL DEL AMBIENTE.

PARA CONSEGUIR UN AMBIENTE UNIFORME DURANTE LA OPERACIÓN DE REJUNTADO, SE DEBEN EMPLEAR AGUA Y ÚTILES COMPLETAMENTE LIMPIOS Y UTILIZAR MATERIALES DE REJUNTADO DE COLORES BLANCO, BEIGE O GRIS.

PREVIO A LA OPERACIÓN DE REJUNTADO, SE DEBE HUMEDECER LIGERAMENTE TODO EL PANEL CERÁMICO, INCLUYENDO EVIDENTEMENTE LAS JUNTAS INTERIORES, PARA EVITAR UN SECADO EXCESIVAMENTE RÁPIDO DEL MATERIAL DE REJUNTADO. EL MATERIAL DE REJUNTADO DEBE CUBRIR TODO EL PANEL CERÁMICO, PARA CONSEGUIR UN ASPECTO UNIFORME Y EVITAR POSIBLES FILTRACIONES DE LÍQUIDOS.

EL REJUNTADO SE DEBE REALIZAR POR TRAMOS DE SUPERFICIE NO EXCESIVAMENTE EXTENSOS. LA RETIRADA DEL MATERIAL SOBRANTE SE DEBE REALIZAR DESPUES DE UN TIEMPO PRUDENCIAL DESDE LA FINALIZACIÓN DE LA OPERACIÓN DEL REJUNTADO.

ESTE TIEMPO DEBE SER LO SUFFICIENTE LARGO COMO PARA QUE SE PRODUZCA EL FRAGUADO DE LA MEZCLA Y NO PODAMOS DESPRENDER EL MATERIAL DE REJUNTADO, PERO NO SE DEBE PROLONGAR EN EXCESO EN EL TIEMPO, YA QUE PODRIAMOS PROVOCAR DURANTE ESA LIMPIEZA, EL RAYADO EN LA SUPERFICIE ESMALTADA.

TANTO PARA LA PRIMERA LIMPIEZA QUE SE REALIZA AL FINALIZAR LA OBRA, COMO PARA LAS POSTERIORES OPERACIONES DE MANTENIMIENTO DIARIO, SE DEBEN EVITAR AGENTES DE LIMPIEZA CON CARÁCTER ÁCIDO, DEBIDO A QUE EL MATERIAL DE REJUNTADO SE PODRÍA VER ALTERADO POR ESTA CIRCUNSTANCIA.

WHEN THE TILES ARE LAID, IT IS VERY IMPORTANT TO USE THE RIGHT TOOLS (A NOTCHED TROWEL, RUBBER MALLETS, TILE SPACERS, AND A RUBBER TROWEL AND SPONGE TO ENSURE WELL-GROUTED TILE JOINTS). AN ADHESIVE RATED CI OR HIGHER, AS PER STANDARD ENI2004, SHOULD BE USED. (GIVEN THE WIDE VARIETY OF POTENTIAL TYPES OF SUBSTRATES AND CIRCUMSTANCES, YOUR ADHESIVE SUPPLIER SHOULD BE CONSULTED IN EACH INDIVIDUAL CASE). CG2 GROUTING MATERIAL SHOULD BE USED, AS PER STANDARD ENI3888. IN AREAS PRONE TO DAMP OR MOISTURE, GROUTING MATERIAL SHOULD BE CHOSEN THAT IS BOTH WATERPROOF AND MOULD RESISTANT. BUTECH RECOMMENDS THE USE OF COLORSTUK RAPID OR EPOTECH AQUA.

TO COMPENSATE FOR ANY POSSIBLE UNEVENNESS IN THE FLOOR, IT IS ADVISABLE TO START LAYING THE TILES FROM A LEVELLED STRAIGHTEDGE POSITIONED AT A HEIGHT OF LESS THAN 29 CM FROM THE ENVISAGED LEVEL OF THE TILED FLOOR SURFACE. (THE ROW OF TILES IN CONTACT WITH THE FLOOR WILL BE CUT TO SIZE SUBSEQUENTLY).

THE TILES SHOULD BE ALLOWED TO REST NATURALLY ON THE STRAIGHTEDGE ON THE BASE POINTS IN THE TILE PATTERN.

IN THIS WAY, THEY WILL BE PROPERLY ALIGNED, AVOIDING ANY PROBLEMS THAT MIGHT OCCUR IF THE TILES WERE LAID FROM THE FLOOR UP AND MISTAKES WERE MADE WHEN THIS ROW WAS CUT (OUT-OF-SQUARE TILES OR PROBLEMS FITTING THEM TOGETHER).

ONCE THE POROUS WALL TILES HAVE BEEN LAID (EXCEPT FOR THE FIRST ROW IN CONTACT WITH THE FLOOR), THE FLOOR TILES SHOULD BE LAID. FINALLY, AFTER REMOVING THE STRAIGHTEDGE, THE LAST ROW OF WALL TILES SHOULD BE BONDED IN PLACE AFTER CUTTING THEM TO THE RIGHT SIZE, AS DEFINED BY THE GAP DOWN TO FLOOR LEVEL.

AN ELECTRICAL DISC CUTTER SHOULD BE USED TO CUT THEM. BECAUSE A HAND-CUTTER WOULD CREATE MORE UNEVEN EDGES. AT THE MEETING POINT BETWEEN WALLS OR BETWEEN WALLS AND FLOORS, THE TILES SHOULD ALSO BE CUT TO SIZE.

PERIMETER JOINTS MUST BE INSERTED SO THAT THE CUT TILES DO NOT TOUCH ADJOINING WALLS, LEAVING A MINIMAL GAP TO ABSORB ANY MOVEMENT. THE TILES AT THE TOP (CEILING LEVEL) AND SIDES OF THE TILED SURFACE WILL ALSO NEED CUTTING.

PROFILES ARE VERY USEFUL FOR FINISHING OFF MEETING POINTS OR CORNERS, ENHANCING THE END FINISH.

TO ENSURE A UNIFORM FINISH WHEN GROUTING THE TILES, IT IS IMPORTANT TO USE CLEAN WATER AND CLEAN TOOLS. WHITE, BEIGE OR GREY GROUTING MATERIALS SHOULD BE USED.

BEFORE GROUTING THE TILES, THE WHOLE TILED SURFACE SHOULD BE SLIGHTLY MOISTENED, INCLUDING ALL INNER JOINTS, SO THAT THE GROUTING MATERIAL DOES NOT DRY TOO FAST. THE WHOLE TILED SURFACE SHOULD BE GROUTED TO ENSURE A UNIFORM APPEARANCE AND PREVENT LIQUID FROM SEEPING THROUGH.

THE TILED SURFACE SHOULD BE GROUTED IN SMALLISH SECTIONS. ANY SURPLUS GROUT SHOULD BE REMOVED AFTER ALLOWING A SUFFICIENT PERIOD OF TIME TO ELAPSE SO THAT THE GROUT HAS SET AND REMAINS INSIDE THE TILE JOINTS. TOO MUCH TIME SHOULD NOT ELAPSE BECAUSE THE GLAZED SURFACE MIGHT GET SCRATCHED WHEN CLEANED.

ACID CLEANING AGENTS SHOULD BE AVOIDED DURING THIS INITIAL CLEANING PROCESS AND IN ANY DAY-TO-DAY CLEANING, BECAUSE THE GROUT MIGHT BE NEGATIVELY AFFECTED.

#### COLOCACIÓN:

- Asegurarse que el soporte estructural esté enrasado y preparado (limpio de polvo, aceites..)
  - El sentido de colocación será desde abajo hacia arriba (sentido ascendente) (1)
  - Utilizar herramientas de colocación adecuadas, así como adhesivos específicos para la baldosa y soporte implicados.
  - Manipular con cuidado.
  - La contrahuella debe apoyar sobre la pieza base (primer escalón) o sobre la huella (sucesivos peldaños). (2)
  - Colocar todas las huellas, dejando la colocación de las contrahuellas para el final. (1)
  - Maestrear la verticalidad sobre la que se coloca la contrahuella hasta el nivel que nos permita, una vez completado el fraguado, colocando en capa fina, llegar al límite exterior de la huella ó a la distancia específica para dejar la diferencia de profundidad deseada entre huella y contrahuella. Según el código técnico de la edificación, para escaleras previstas para evacuación ascendente, ó las utilizadas preferentemente por niños, ancianos ó personas con discapacidad, no se permite bocel ni resalte (huella y contrahuella deben quedar perfectamente alineados), para evitar tropiezos y caídas. (3)
  - Cortar la contrahuella a la medida establecida para cumplir con el dimensionamiento inicial de la escalera (el código técnico de la edificación establece que para escaleras de uso general, la altura del peldaño debe de ser inferior a 18,5 cm y superior a 13 cm, además, la superficie pisable (huella) debe ser superior a 28 cm. (4)
  - Las baldosas deben quedar perfectamente macizadas, sin huecos, para evitar potenciales fuentes de roturas ó despegues. (2)
  - Se debe proceder al rejuntado entre las distintas piezas, empleando para ello los materiales recomendados por Porcelanosa.
  - Proteger el material ya colocado hasta que finalice la obra, con el fin de evitar daños sobre la superficie cerámica durante los trabajos posteriores.
- INSTALLATION:**
- Make sure that the substrate is flat and ready for laying the treads (with no dust, oil or grease etc).
  - Start to lay the treads from the bottom of the staircase (moving upwards). (1)
  - Use suitable tile-laying tools and the right adhesive for the tiles and substrate.
  - Handle the tiles with care.
  - The stair riser of the first step should rest on the bottom floor tile. Subsequent risers should rest on the stair tread below each one. (2)
  - Lay all the stair treads before proceeding to lay the risers. (1)
  - Level the vertical substrate for each stair riser so that, once the cement has set and the stair riser has been laid using the thin bed method, it reaches the outer edge of the stair tread above it or leaves the desired joint between them.
  - According to the Spanish Building Code, when stairs are used for upward evacuation or mainly used by children, the elderly or the disabled, stair nosings or overhanging treads are forbidden. (The tread and riser must be edge to edge). (3)
  - Cut the stair riser to the right size to comply with the initial plans for the stairs. (The Spanish Building Code establishes that stairs for general use should have steps with a height of over 13 cm and less than 18.5 cm and that the treads should be bigger than 28 cm). (4)
  - Bond the tiles solidly, making sure that there are no voids, to prevent them from breaking or coming loose. (2)
  - Grout the tiles using materials recommended by Porcelanosa.
  - Protect the tiled surfaces until all on-site work has been completed in order to prevent them from being damaged during subsequent building tasks.

#### DECLARACIÓN AMBIENTAL DE PRODUCTOS DE LA CONSTRUCCIÓN (DAPc)

DAPc.002.003-008

EL SISTEMA DESARROLLADO DE DECLARACIONES AMBIENTALES DE PRODUCTOS DE LA CONSTRUCCIÓN (DAPC) SE HA CREADO PARA FACILITAR LA ADAPTACIÓN DEL SECTOR DE LA CONSTRUCCIÓN A UN NUEVO MODELO MÁS COHERENTE Y SOSTENIBLE MOTIVADO POR UN MAYOR INTERÉS SOCIAL PARA DISMINUIR EL IMPACTO AMBIENTAL, INCLUIDO EN EL MUNDO DE LA CONSTRUCCIÓN, UNO DE LOS DE MAYOR IMPACTO, TRATARSE DE UNA INICIATIVA PIONERA EN ESPAÑA Y ESTAR AL NIVEL DE ALGUNOS PAÍSES PUNTEROS DE EUROPA EN ESTE TEMA Y LA CREACIÓN DE NUEVAS EXIGENCIAS MEDIOAMBIENTALES POR LA LEGISLACIÓN. FUNDAMENTALMENTE, SE TRATA DE CONSEGUIR UNA MEJORA AMBIENTAL DE LA CONSTRUCCIÓN DESDE UN BUEN CONOCIMIENTO DE LOS IMPACTOS DE CADA UNO DE LOS COMPONENTES ASÍ COMO LA TRANSPARENCIA MEDIOAMBIENTAL DEL SECTOR. (FUENTE: [HTTP://ES.CSOSTENIBLE.NET/DAPC/OBJETIVOS/](http://ES.CSOSTENIBLE.NET/DAPC/OBJETIVOS/))

THE SYSTEM DEVELOPED FOR ENVIRONMENTAL DECLARATIONS FOR BUILDING PRODUCTS (EPD) HAS BEEN CREATED IN ORDER TO HELP THE CONSTRUCTION SECTOR ADAPT TO A NEW, MORE COHERENT AND MORE SUSTAINABLE MODEL, MOTIVATED BY GROWING SOCIAL INTEREST IN REDUCING ENVIRONMENTAL EFFECTS IN THE FIELD OF CONSTRUCTION, ONE OF THE SECTORS THAT CAUSES THE GREATEST IMPACT. THIS IS A PIONEERING INITIATIVE IN SPAIN, AIMED AT ACHIEVING THE SAME LEVEL AS SOME OF THE LEADING EUROPEAN COUNTRIES IN THIS AREA, AND IN LINE WITH THE DEMANDS RESULTING FROM NEW ENVIRONMENTAL LEGISLATION. THE GOAL IS TO ACHIEVE ENVIRONMENTAL IMPROVEMENTS IN THE CONSTRUCTION SECTOR, BASED ON A THOROUGH UNDERSTANDING OF THE IMPACTS CAUSED BY EACH OF ITS COMPONENTS, AS WELL AS THE ENVIRONMENTAL TRANSPARENCY OF THE SECTOR. (SOURCE: [HTTP://ES.CSOSTENIBLE.NET/DAPC/OBJETIVOS/](http://ES.CSOSTENIBLE.NET/DAPC/OBJETIVOS/))

## CERTIFICADOS // CERTIFICATES

### ISO 14021

FIEL A SU COMPROMISO CON EL MEDIO AMBIENTE, PORCELANOSA HA DESARROLLADO STON-KER® ECOLOGIC, UNA COLECCIÓN DE BALDOSAS FABRICADAS CON MATERIAL RECICLADO PROVENIENTE DEL PROPIO PROCESO DE PRODUCCIÓN.

EL SOPORTE DE STON-KER® ECOLOGIC SE ELABORA A PARTIR DE MATERIAL RECICLADO DE PRECONSUMO (TIESTO CRUDO Y POLVO DE ASPIRACIÓN) QUE ES REINCORPORADO AL PROCESO DE PRODUCCIÓN. LA PRODUCCIÓN DE STON-KER® ECOLOGIC SUPONE UNA NOTABLE REDUCCIÓN EN EL CONSUMO DE MATERIAS PRIMAS (ADEMÁS DE MINIMIZAR EL IMPACTO AMBIENTAL ASOCIADO A LA EXTRACCIÓN Y TRANSPORTE DE LAS MISMAS), ASÍ COMO UN SIGNIFICATIVO AHORRO ENERGÉTICO EN LA PRODUCCIÓN DE BALDOSAS CERÁMICAS.

EL CONTENIDO EN MATERIAL RECICLADO, SUPERIOR AL 95%, SE RECOGE EN LA DECLARACIÓN AMBIENTAL DE PRODUCTO, CERTIFICADO POR ISO 14021, Y QUE CERTIFICA A TRAVÉS DE UN ORGANISMO EXTERNO DE CONFIANZA EL CARÁCTER ECOLÓGICO DE LA SERIE.

LA UTILIZACIÓN DE STON-KER® ECOLOGIC EN EL REVESTIMIENTO DE EDIFICIOS APORTA VALORACIÓN ADICIONAL (PUNTOS EXTRA) EN LA EVALUACIÓN DE LOS MISMOS POR LOS PRINCIPALES REFERENCIALES EXISTENTES EN EL MERCADO (LEED, BREEAM, VERDE,...)

## CERTIFICADOS // CERTIFICATES

### ISO 50001:2011

PORCELANOSA HA IMPLANTADO UN SISTEMA DE GESTIÓN ENERGÉTICA DE ACUERDO A LA NORMA ISO 50001, COMO UNA HERRAMIENTA QUE PERMITA LA REDUCCIÓN DE LOS CONSUMOS DE ENERGÍA Y CONSECUENTEMENTE LAS EMISIONES DE GASES DE EFECTO INVERNADERO. A TRAVÉS DE LA MEJORA DEL DESEMPEÑO ENERGÉTICO, SE PERSIGUE FOMENTAR LA MÁXIMA EFICIENCIA EN TODOS NUESTROS PROCESOS, REFENDANDO DE ESTA FORMA EL CLARO COMPROMISO MEDIOAMBIENTAL ADOPTADO DESDE EL INICIO DE LA ACTIVIDAD.

PORCELANOSA HAS IMPLEMENTED AN ENERGY MANAGEMENT SYSTEM IN ACCORDANCE WITH THE ISO 50001 STANDARD, DESIGNED TO ACT AS A TOOL FOR THE REDUCTION OF ENERGY CONSUMPTION AND CONSEQUENTLY THE EMISSION OF GREENHOUSE GASES. BY IMPROVING ENERGY PERFORMANCE LEVELS, THE AIM IS TO PROMOTE MAXIMUM EFFICIENCY IN ALL OUR PROCESSES, THEREBY FURTHER ENDORSING THE CLEAR ENVIRONMENTAL COMMITMENT MAINTAINED BY THE COMPANY THROUGHOUT ITS HISTORY.

## CERTIFICADOS // CERTIFICATES

### ISO 9001:2008

CON LAS PREMISAS DE MEJORA CONTINUA Y SATISFACCIÓN DE CADA CLIENTE, PORCELANOSA ASEGURA LAS PRESTACIONES, TANTO ESTÉTICAS COMO TÉCNICAS, DE SUS PRODUCTOS A TRAVÉS DE UN SISTEMA DE GESTIÓN DE CALIDAD CERTIFICADO POR LA NORMA ISO 9001, APLICADO AL DISEÑO, PRODUCCIÓN, DISTRIBUCIÓN Y COMERCIALIZACIÓN DE PAVIMENTOS, REVESTIMIENTOS Y PIEZAS ESPECIALES CERÁMICAS.

WITH A PHILOSOPHY BASED ON-GOING IMPROVEMENTS AND CUSTOMER SATISFACTION, PORCELANOSA GUARANTEES THE AESTHETIC AND TECHNICAL CHARACTERISTICS OF ITS PRODUCTS BY APPLYING A QUALITY-CONTROL SYSTEM CERTIFIED BY ISO 9001 TO THE DESIGN, PRODUCTION, DISTRIBUTION AND COMMERCIALISATION OF ITS WALL AND FLOOR TILES AND TRIMS.

## CERTIFICADOS // CERTIFICATES

### ISO 14001:2004

EN EL CONTEXTO DE UNA LEGISLACIÓN CADA VEZ MÁS EXIGENTE, PORCELANOSA DEMUESTRA SU SÓLIDO COMPROMISO MEDIOAMBIENTAL MEDIANTE LA ADOPCIÓN DE UN SISTEMA DE GESTIÓN CERTIFICADO POR LA NORMA ISO 14001, TRANSMITIENDO DE ESTA FORMA NUESTRA POLÍTICA DE RESPETO Y PREOCUPACIÓN POR EL MEDIO AMBIENTE.

WITH A FRAMEWORK OF INCREASINGLY STRICT LEGISLATIVE CONTROLS, PORCELANOSA HAS DEMONSTRATED ITS FIRM COMMITMENT TO THE ENVIRONMENT WITH THE INTRODUCTION OF A MANAGEMENT SYSTEM CERTIFIED TO ISO 14001, thus reflecting its respect and concern for the environment.

MUCHOS FABRICANTES EUROPEOS DE SUELOS, USAN ENSAYOS DEL TIPO DE LA RAMPA PARA CLASIFICAR SUS PRODUCTOS EN FUNCIÓN DEL GRADO DE DESLIZAMIENTO. ESTOS ENSAYOS SE LLEVAN A CABO GENERALMENTE, USANDO LA NORMA ALEMANA DIN 51130.

EL MÉTODO IMPlica EL USO DE SUJETOS QUE CAMINAN ADELANTE Y ATRÁS A TRAVÉS DE UN SUELO IMPREGNADO Y UTILIZADO COMO BANCO DE ENSAYOS EN FORMA DE RAMPA. EL GRADO DE INCLINACIÓN DE LA RAMPA SE VA INCREMENTANDO GRADUALMENTE HASTA QUE EL SUJETO QUE ESTÁ ENSAYANDO, RESBALA. EL ÁNGULO MEDIO DE INCLINACIÓN AL QUE EL SUJETO RESBALA, ES UTILIZADO PARA CALCULAR EL COF (COEFICIENTE DE FRICCIÓN). LA NORMA DIN 51130 UTILIZA UNAS BOTAS DE SEGURIDAD SEGÚN NORMA EN 345 Y ACEITE DE MOTOR COMO SUSTANCIA QUE IMPREGNE LA SUPERFICIE A ENSAYAR.

MANY EUROPEAN FLOORING MANUFACTURERS USE TESTS LIKE THE RAMP TEST TO RATE THEIR PRODUCTS ACCORDING TO THEIR SLIP RESISTANCE. THESE TESTS ARE GENERALLY CONDUCTED USING THE GERMAN STANDARD, DIN 51130.

WITH THIS METHOD, A PERSON WALKS BACKWARDS AND FORWARDS ON AN IMPREGNATED RAMP-TYPE FLOOR USED AS A TEST BENCH. THE ANGLE OF THE RAMP IS GRADUALLY INCREASED UNTIL THE PERSON SLIPS. THE AVERAGE ANGLE AT WHICH THE PERSON SLIPS IS USED TO CALCULATE THE COF (COEFFICIENT OF FRICTION). DIN 51130 USES APPROVED SAFETY BOOTS ACCORDING TO STANDARD EN 345 AND ENGINE OIL TO IMPREGNATE THE TEST SURFACE.

#### MÉTODO DE LA RAMPA (DIN 51130):

RAMP METHOD (DIN 51130):

| VALOR TOTAL MEDIO DEL ÁNGULO DE CAÍDA<br>TOTAL MEAN VALUE OF SLIP ANGLE | GRUPO DE CLASIFICACIÓN<br>RATING |
|---|----------------------------------|
| 6° < ÁNGULO <= 10°  | R9                               |
| 10° < ÁNGULO <= 19°   | R10                              |
| 19° < ÁNGULO <= 27°   | R11                              |
| 27° < ÁNGULO <= 35°   | R12                              |
| 35° < ÁNGULO  | R13                              |

(\*) LAS ENTRADAS SE REFIEREN A AQUELLAS ZONAS A LAS QUE SE PUEDE ACCEDER DIRECTAMENTE DESDE EL EXTERIOR Y EN DONDE LA HUMEDAD PUEDE LLEGAR O SER INTRODUCIDA DESDE EL EXTERIOR.  
ENTRANCES REFER TO PLACES WITH DIRECT ACCESS FROM THE OUTSIDE OF THE BUILDING WHERE WETNESS MIGHT BE BROUGHT INSIDE.

(\*\*) LAS ESCALERAS SE REFIEREN ÚNICAMENTE A AQUELLAS LAS QUE PUEDE LLEGAR O SER INTRODUCIDA LA HUMEDAD DESDE EL EXTERIOR, COMO LAS SITUADAS DIRECTAMENTE A CONTINUACIÓN DE LAS ENTRADAS CON ACCESO DESDE EL EXTERIOR.  
STAIRS ONLY REFER TO THOSE WHERE WETNESS MIGHT BE BROUGHT INSIDE FROM OUTSIDE THE BUILDING OR ONES LOCATED DIRECTLY AFTER ENTRANCES WITH DIRECT ACCESS FROM THE OUTSIDE.

EL CÓDIGO TÉCNICO DE LA EDIFICACIÓN, DENTRO DE SU DOCUMENTO BÁSICO DE SEGURIDAD DE UTILIZACIÓN I "DB SU I - SEGURIDAD FREnte AL RIESGO DE CAÍDAS", DEFINE LOS REQUISITOS QUE DEBE CUMPLIR UN SUELO PARA PODER SER UTILIZADO COMO PAVIMENTO DE LOS EDIFICIOS O ZONAS DE USO SANITARIO, DOCENTE, COMERCIAL, ADMINISTRATIVO, APARCAMIENTO Y PÚBLICA CONCURRENCIA (EXCLUIDAS LAS ZONAS DE USO RESTRINGIDO). PARA ELLA, EL PAVIMENTO DEBERÁ CUMPLIR CON UN VALOR MÍNIMO AL DESLIZAMIENTO "RD" O "SRV".  
EL VALOR DE RESISTENCIA AL DESLIZAMIENTO RD - SRV (SLIP RESISTANCE VALUE) SE DETERMINA MEDIANTE EL ENSAYO DEL PÉNDULO DESCrito EN EL ANEXO A DE LA NORMA UNE-ENV I2633:2003.

#### RESISTENCIA AL DESLIZAMIENTO / Slip resistance.

| Icono | Resistencia al deslizamiento Rd | Clase |
|-------|---------------------------------|-------|
|       | Rd ≤ 15                         | 0     |
|       | 15 < Rd ≤ 35                    | 1     |
|       | 35 < Rd ≤ 45                    | 2     |
|       | Rd > 45                         | 3     |

| CLASE EXIGIBLE A LOS SUELOS EN FUNCIÓN DE SU LOCALIZACIÓN  |
|--|
| LOCALIZACIÓN Y CARACTERÍSTICAS DEL SUELO   |
| Zonas interiores secas.  |
| <ul style="list-style-type: none"> <li>Superficies con pendiente menor que el 6%</li> <li>Superficies con pendiente igual o mayor que el 6% y escaleras.</li> </ul>              |
| Zonas interiores húmedas, tales como las entradas a los edificios desde el espacio exterior <sup>(1)</sup> , terrazas cubiertas, vestuarios, duchas, baños, aseos, cocinas, etc. |
| <ul style="list-style-type: none"> <li>Superficies con pendiente menor que el 6%</li> <li>Superficies con pendiente igual o mayor que el 6% y escaleras.</li> </ul>              |
| Zonas exteriores. Piscinas <sup>(2)</sup> . Duchas   |

(1) Excepto cuando se trate de accesos directos a zonas de uso restringido  
(2) En zonas previstas para usuarios descalzos y en el fondo de los vasos, en las zonas en las que la profundidad no excede de 1.50m

#### RESISTENCIA AL DESLIZAMIENTO, COEFICIENTE DE FRICCIÓN DINÁMICO (DCOF) // SLIP RESISTANCE, DYNAMIC COEFFICIENT OF FRICTION

LA VALORACIÓN DE LA PRESTACIÓN ANTIDESLIZANTE EN EL MERCADO AMERICANO SE LLEVA A CABO A TRAVÉS DE UN ROBOT MÓVIL (BOT 3000). ESTE EQUIPO CIRCULA SOBRE LA SUPERFICIE A TESTAR (WETTED PREVIOUSLY) Y DETERMINA LA RESISTENCIA DE LA MISMA AL MOVIMIENTO DEL EQUIPO.

LA NORMATIVA EN ESTADOS UNIDOS (NORMA ANSI) REQUIERE UN VALOR DCOF ≥ 0.42 PARA SUPERFICIES SUSCEPTIBLES DE ESTAR MOJADAS.

IN THE AMERICAN MARKET, THE ASSESSMENT OF THE ANTI-SLIP PERFORMANCE IS CARRIED OUT THROUGH A MOBILE ROBOT (BOT 3000). THIS UNIT TRAVELS ON THE SURFACE BEING TESTED (WETTED PREVIOUSLY) AND DETERMINES ITS RESISTANCE IN RESPONSE TO THE UNIT'S MOVEMENT.

THE EEUU STANDARDS (ANSI STANDARD) REQUIERE A DCOF VALUE ≥ 0.42 FOR SURFACES WHICH ARE SUSCEPTIBLE OF GETTING WET.

## 2015 - CATALOGO Nº P-I V.I 01 / 2015

PORCELANOSA S.A. se reserva el derecho de modificar y/o suprimir ciertos modelos expuestos en este catálogo sin previo aviso. Los colores de las piezas pueden presentar ligeras diferencias respecto a los originales. Los ambientes se muestran en este catálogo son sugerencias decorativas de carácter publicitario debiéndose utilizar en la instalación real las instrucciones de colocación editadas por PORCELANOSA.

### 2015 PORCELANOSA

El contenido de este catálogo está protegido por la Ley de Propiedad Intelectual, Real Decreto Legislativo 1/1996. Cualquier reproducción del mismo, en parte o en su totalidad, sin autorización expresa de PORCELANOSA puede ser sancionada conforme el Código Penal.

PORCELANOSA S.A. reserves the right to modify and/or discontinue certain models displayed in this catalogue. The colours of pieces displayed herein may differ slightly from originals. The settings shown in this catalogue are design proposals for advertising purposes. In real situations in which the tiles are laid, the installation instructions published by PORCELANOSA should be followed.

### 2015 PORCELANOSA

The contents of this catalogue are protected by virtue of the Spanish Intellectual Property Act, Royal Legislative Decree 1/1996. The partial or total reproduction of this catalogue, without the express authorisation of PORCELANOSA is punishable under the Spanish Criminal Code.
